

QCTool V2.2.x

Installation Instructions for CD-ROM Installation

*QCTool offers data processing and quality control for small and very large data files.
Our CD-ROM Installation offers fast installation. Included on the CD are several example files.*

*QCTool offers import of general XYZ ASCII column format files in various forms plus Excel .csv, BINARY XYZ, Geosoft .gdn, PICO formats, Picodas formats, MarineMagnetics formats and Scintrex CGx formats, GEM magnetometer formats and Scintrex magnetometer formats.
Header lines should have a '/' preceding the remainder of the line for XYZ formats. The .csv formats may utilize "" for text*

A Serial Number is on the CD. You will be requested for this during the registration process. You must be online to complete the registration process. An offline option is available. Please refer to instructions during registration.

Do not lose this serial number. This is your license.

QCTool offers an update process through the internet. To find this link, look under "HELP".

Insert the CD into your CDRom.

If AutoRun is configured on your computer, the installation will begin automatically

If not, Run CD_Drive:\ setup.exe

Special Instructions for Windows NT and Windows 2000 and Windows XP and Windows Vista users:

--- The installer must have administrative privileges. If this is not possible then after installation:

Add the "\bin" to your path : e.g. "c:\Program Files\QCTool\bin

Note: *If you have installed QCTool into a directory other than "c:\Program Files\QCTool" (the default directory) ensure that you use that path in the above step.*

You must now re-boot your computer.

IMPORTANT: A manual can be found on the CD in the HELP directory.

On Line Help is available within the program..
